	Environmental Policy			POL-004-1.2
	Issue No:	1.1	Issue date:	

Purpose & Scope

Sydney Waste Services is an Australian owned and operated Company. Its activities include, Waste Collection Services and providing its customers with the relevant waste and recycling receptacles and machinery, primarily the supply of plastic and metal Bins.

Policy & Procedure

Sydney Waste Services is committed to the development, implementation, execution and maintenance of environmental procedures and construction methods which address, comply with or meet the objectives of the relevant statutory and regulatory obligations, community environmental standards and expectations, ISO 14001, and specific project requirements.

This commitment will be evidenced by the implementation of suitable project specific environmental plan and controls and the appointment of suitable personnel responsible for the monitoring and adjustment of these environmental controls.

Objectives

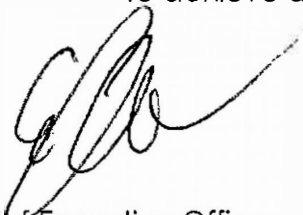

To identify and manage risks to and impacts on the environment arising from work activities; and

To foster environmental awareness and encourage a genuine respect for environmental protection in employees.

Strategies

In meeting these objectives Sydney Waste Services will take a socially responsible attitude to the environment by:

- recognising the need for ecological and resource sustainability;
- identifying environmental concerns and sensitivities;
- reducing pollution and our carbon footprint;
- setting relevant environmental targets in both the short term and long term;
- monitoring and reviewing environmental objectives, targets and performance as the basis of a commitment to continual improvement;
- communicating openly with clients, the government and the community on environmental issues;
- communicating this policy to all employees and subcontractors; and
- developing and using the best applicable environmental protection techniques to achieve and evidence a commitment to the prevention of pollution.
