

Sydney Waste Pty Ltd (Sydney Waste Services (SWS)) is proposing to construct and operate a combined resource recovery facility and waste transfer station at an industrial site at 136 Hassall Street, Wetherill Park, NSW.

Project Benefits:

- Has capacity to receive and process up to 200,000 tonnes per year of municipal, commercial and industrial, food and garden waste contributing to managing waste.
- Would contribute to NSW achieving resource recovery targets under the NSW Waste and Sustainable Materials Strategy 2041 (DPIE 2020), by increasing quantities of waste diverted from landfill.
- Would enhance recycling efforts, improving waste management and future sustainability.

Timeline:

The project will be assessed as a State Significant Development under the NSW *Environmental Planning and Assessment Act 1979*.

★ We are here

Planning phase: 2023

Approvals and construction phase: 2024

Operations: 2025

Planning and next steps: Detailed technical studies, design development and consideration of community expectations are currently underway. Findings will feed into the environmental assessment known as an Environmental Impact Statement (EIS). **Community will be invited to make submissions in 2024 during the EIS Public Exhibition period.**

Community correspondence SWS recognises the importance of community engagement and is committed to providing information about the project as it progresses.

Contact us: For more information or questions on the proposal, contact the community engagement team on community.input@ghd.com or call 1800 810 680.
